OBJECTIVE

I have over 1.5 year of experience working across the entire stack of Web development. I am seeking opportunities to join a company that can help me in enhancing my skills, strengthening my knowledge and realising my potential. I am willing to explore a wide variety of opportunities that can help me gain perspective.

SKILLS

Expert: JavaScript, ES6, React Js, React Router, Material UI, C, C++.
Familiar : Node.js, MongoDB, TypeScript, React Bootstrap, Rest API, OOP.
Tools : Git, Chrome Dev Tools, VS Code, Firebase , Netlify , Heroku.

PROJECTS

Doctor Portal | Live | Client | Server

- It is a MERN Stack SPA where patients can make doctor's appointment for them.
- Patients have to register in first to take any appointment.
- There are two roles in the website i) User and ii) Admin.
- In Patient Dashboard, Patients can see the appointments they made and leave a review
- In Admin Dashboard, Admin can see all the appointments all the users made. Admin can add or manage service, and Admin can grant Admin access to another person.

Technology: React , React Router, Node.js, MongoDB, Bootstrap, Firebase, Heroku.

Amazon Shop | Live | Client | Server

- A full-stack E-commerce Website. Where users will see the details of product, users will be able to take any service.
- Users must first register/log in to receive any service. This web app provides an admin page from which the admin control the entire page.
- Firebase authentication system has been added to the application.
- The app allows users to make purchases of their choice, which has been auth checked before.

Technology: React , React-Router, Node, MongoDB, Bootstrap, Firebase, Heroku.
